Members of Pritchett Water Supply Corporation
Notification of Maintenance/Repairs on Plant #20

Beginning Monday, April 8, 2019, Pritchett Water Supply will be doing mandatory maintenance on the elevated storage tank @ Plant #20, 3670 State Hwy 155 S, Gilmer, Texas, also known as the office location. Thursday, April 4, 2019 the tank will be bypassed and taken out of service for the duration of the maintenance. You will not be without water as water from other Plants and Wells will be redirected at this time. However, you may experience a variance of pressure and possible discolored water. The water has been disinfected and safe for use but due to pressure changes, minerals that discolor the water may be observed. Estimated time of maintenance is 45 days, so please be patient as these maintenance issues must be addressed and completed. Please contact the office @ 903-734-5438 if you experience any issues to help us pinpoint problem areas, and please be conservative with water usage as much as possible. We apologize for any inconveniences during this time of maintenance. We have highlighted areas on the map for you to see if your water may be affected.
Areas that maybe affected...
